

## **ACCET**

National Holistic Institute's accrediting body, ACCET, defines the placement rate as the number of graduates (completers) employed in their field of training, divided by the number of graduates (completers) available for employment.

- "Completers available for employment" means the number of graduates minus up to 15% waivers (exclusions).
- "Graduates employed in the field" means graduates who are employed in a position for which the skills obtained through the education and training. Graduate employment must be verified at least 30 days after graduation, and employment must be maintained for at least 30 days within that reporting period.
- "Waivers" (exclusions) mean graduates who, after graduation, have verified that they are unable to pursue or opt out of training related employment.

## **BPPE**

The California Bureau for Private Postsecondary Education defines the placement rate as the number of graduates (completers) employed in their field of training, divided by the number of graduates (completers) available for employment.

- "Graduates available for employment" means the number of graduates minus the number of graduates unavailable for employment (exclusions).
- "Graduates employed in the field" means graduates who are gainfully employed within six months of graduation in a position for which the skills obtained through the education and training provided by the institution are required or provided a significant advantage to the graduate in obtaining the position.
- "Graduates unavailable for employment" (exclusions) means graduates who, after graduation, die, become incarcerated, are called to active military duty, are international students that leave the United States or do not have a visa allowing employment in the United States, or are continuing their education at an accredited or bureau-approved postsecondary institution.
